## Avcom SMT Quality policy

It is the goal of this Company to meet and exceed the expectations of our customers' needs in Electronic Manufacturing Services to include Circuit Board Assembly, Rework, Modification and Repair of Circuit Board Assemblies and Quick Turn Prototyping, servicing Industrial, Commercial, and Military markets. This can only be achieved through leadership and teamwork within the Company structure. The Management at Avcom SMT, Inc. is committed to continually improve the effectiveness of our quality management system by using Risk Based thinking while striving to meet the satisfaction of all interested parties. Quality objectives have been established and are continually reviewed to provide the best possible services to our customers. Management will ensure that this philosophy is understood throughout the organization through training and open communication.

Our staff will communicate with the customer to achieve the desired results while addressing any risk involved. All work is done under the guidelines of IPC/ANSI standards and our assembly work is guaranteed. Any corrections that have to be made will be completed upon notification and corrective and preventative actions will be implemented to improve the process. Avcom has an in-house network in place to update documentation on all projects.

**The basic quality philosophy at Avcom is that the customers' requirements will be accommodated and everyone will work so that the job is accomplished on time, without defects, and ensuring no returns from customers.**
